

2023 Michigan Surgical Quality Collaborative			
Performance Index Scorecard			
Project Time Period: 1/1/2023 – 12/31/2023			
Measure	Weight	Measure Description	Points
1	8	Collaborative Meetings (4) – Surgical Clinical Quality Reviewer (SCQR)	
		3 or more meetings	8
		2 meetings	4
		1 meeting	0
2	8	Collaborative Meetings (3) – Surgeon Champion	
		3 meetings	8
		2 meetings	4
		1 meeting	0
3	4	Conference Calls (3) – SCQR	
		2 or more calls	4
		1 call	2
		0 calls	0
4	4	Conference Calls (3) – Surgeon Champion	
		2 or more calls	4
		1 call	2
		0 calls	0
5	6	Completeness of Data (maximum 6 pts available)	
		Sampled and incomplete cases ≤0.5% total volume	3
		30 day follow-up rate ≥80% for 1st quarter 2022 (Jan – March cases)	1
		30 day follow-up rate ≥80% for 2nd quarter 2022 (April – June cases)	1
		30 day follow-up rate ≥80% for 3rd quarter 2022 (July – September cases)	1
6	20	Collaborative Wide Measure – Reduce % of all MSQC elective procedures performed on patients who have smoked within the last 30 days *	
		≤ 13.9%	20
		14.0% - 14.4%	15
		14.5% - 15.0%	10
		15.1% - 15.6%	5
		≥ 15.7%	0
7	20	Site Directed Measure: Sites choose a measure they are performing above/below MSQC threshold	
		Demonstrate ≥25% improvement in performance	20
		Demonstrate ≥15% improvement in performance	15
		Demonstrate ≥10% improvement in performance	10
		Demonstrate ≥5% improvement in performance	5
7	10	Complete documentation of size and location of hernia ≥ 90%	5
		Complete documentation of cancer variables = 100%	5
7	20	Quality Improvement Initiative (QII) - Pilot study, choose:	
		SUCCESS Toolkit Implementation	
		MPROVE	
		Frailty Screening	
		QI Project developed and implemented and site met or exceeded target	20
QI Project developed and implemented and site made improvement toward, but did not meet the goal.	15		
QI Project developed and implemented but there was no improvement to the target	10		
QI Project not developed or implemented	0		
Optional	5	Bonus points to be added^ to reflect active participation in MOQC over-sampling of hysterectomy cases. Points available when:	
		Site fully participates by over-sampling and abstracting all gyn-onc hysterectomy cases	5
		Site partially participates by over-sampling gyn-onc hysterectomy cases only	2
Total Available Points			100

^Earned bonus points will be added to Scorecard total, with final score not to exceed 100 points overall.

See MSQC/MOQC Cross-Collaborative Project Summary document for details.

*These goals may be updated at the end of 2022 once more data is available.
